Guidelines for CCA 2 – Digital Marketing (Group Project).

CCA 2 Project Theme

Design a User-Friendly Website with Proper Layout and Navigation, Including Integration of Self-Created Social Media Pages

1. Core Submission Requirement (Mandatory)

Students are required to submit an **Executive Summary**, which is a concise, high-level overview of the website project.

The executive summary must clearly outline:

- The purpose of the website
- Project goals and objectives
- Target audience
- Proposed digital solutions
- Application of design principles
- Analysis of user needs
- Evaluation of layout and navigation choices
- Creative integration of self-created social media pages

This document should reflect strategic clarity, analytical depth, and professional structure.

Word Limit: **1500–2000 words**

Mode of Submission: **Written Report (Printed copies – Spiral binding)**

2. Project Objective

This project is designed to evaluate your ability to:

- Apply web design and UX principles in a business context
- Analyze digital consumer behavior
- Design intuitive website navigation
- Integrate social media strategically
- Develop a cohesive digital marketing presence
- Justify design and platform decisions logically

3. Step 1: Select a Business Concept: Each group must choose or create a business idea such as: (Students can choose any idea of their own choice)

- E-commerce brand

SOB Digital Marketing

- Service-based business
- Startup concept
- NGO initiative
- Educational platform

Clearly define:

- Business name
- Industry category
- Value proposition
- Target segment

4. Website Development Requirements

You may use platforms such as:

- Wix
- WordPress
- Google Sites
- Canva Website Builder
- Figma (prototype)

The website must include:

1. Home Page
2. About Us
3. Products/Services
4. Blog/Insights
5. Contact Page
6. Campaign Landing Page

A. Layout Requirements

- Clear visual hierarchy
- Balanced spacing and alignment
- Consistent color scheme
- Professional typography
- Functional header and footer

B. Navigation Requirements

SOB Digital Marketing

- Logical menu structure (max 6–7 items)
- Easy internal linking
- Clear Call-to-Action buttons
- Simple user journey flow

You must **evaluate and justify** your navigation decisions in the executive summary.

C. UX and Design Application

Your executive summary must briefly highlight:

- Application of usability principles
- Accessibility considerations
- Responsiveness
- Keyword integration (SEO orientation)
- User-centered design approach

5. Social Media Integration (Compulsory Component)

Each group must create original social media pages for the same business on:

- Instagram
- Facebook
- LinkedIn or YouTube (based on business model)

Requirements:

- Minimum 5 original posts per platform
- Brand-consistent visuals
- Strategic captions and hashtags
- Defined engagement objective

You must:

- Integrate social media links within the website
- Explain platform selection
- Evaluate how social media supports traffic, engagement, and conversion

6. Analytical Components to be Included in Executive Summary: Your document must include:

A. Target Audience Analysis

- Demographics
- Psychographics

SOB Digital Marketing

- Digital behavior
- Buying journey

B. User Needs Analysis

- What problem is solved?
- What user expectations were considered?
- How does the design address these needs?

C. Layout & Navigation Evaluation

- Why this layout structure?
- Why this menu hierarchy?
- Why these CTAs?
- How does it enhance usability?

D. Digital Marketing Strategy Overview

- SEO basics
- Content marketing approach
- Social media funnel
- Conversion strategy

7. Evaluation Criteria (25 Marks)

Your project will be evaluated based on:

1. Application of Web Design & UX Principles
2. Relevance and Purpose Alignment
3. Depth of Website Analysis
4. Critical Evaluation of Social Media Integration
5. Technical Execution & Digital Creativity

8. Academic Integrity Guidelines

- This is a group-based submission.
- Plagiarism is strictly prohibited.
- Fully AI-generated websites without conceptual understanding will be penalized.
- Work must demonstrate originality and strategic thinking.

9. Submission Details

- Format: PDF (Executive Summary + Screenshots)

SOB Digital Marketing

- Include screenshots of:
    - Website pages
    - Navigation structure
    - Social media pages
- **Submit before the 8th April 2026.**

Rubric for Project-Based Assessment - 'Digital Marketing'

The assessment is mapped on CO3, CO4, CO5 and CO6

Table 2- COs mapped with CCA

CO #	Cognitive Ability	Course Outcome
CO3	**APPLYING**	Make Use of the digital marketing concepts in given business situations
CO4	**ANALYSING**	Compare digital marketing techniques in different business situations
CO5	**EVALUATING**	Determine suitable digital marketing practices for a given business situation.
CO6	**CREATING**	Design a digital marketing campaign for given commodities, goods, services, e-products/ e-services.

SOB Digital Marketing

Excellent (5)	Good (4)	Satisfactory (3)	Needs Improvement (2)	Poor (1)
Applies 4–5 relevant web design including keywords and UX principles (layout, navigation, usability, accessibility, responsiveness) accurately with strong practical implementation.	Applies 3–4 web design principles including keywords correctly with clear usability and minor design gaps.	Applies 2–3 basic design principles; functionality is acceptable but lacks refinement.	Applies 1–2 principles inconsistently; understanding of usability appears superficial.	. No valid application of web design or UX principles; website structure is poor.
Website design is fully aligned with its stated purpose; navigation and content structure are intuitive and meaningful.	Website mostly aligns with purpose; navigation and layout are appropriate but not optimized.	Website shows general relevance to purpose; linkages are basic or weak.	Website purpose is unclear; layout and navigation are loosely aligned.	No relevance between website design and stated purpose.
Clearly analyzes 3 or more key usability or design issues with logical reasoning and design justification.	Analyzes 2–3 design issues with reasonable explanation and partial justification.	Identifies 1–2 design issues; analysis is mostly descriptive.	Analysis is shallow; key design or usability issues are not clearly identified.	No meaningful analysis: design decisions are unexplained or incorrect.
Evaluates the effectiveness of self-created social media integration with clear justification for platform selection and placement.	Social media integration is relevant and evaluated with minor gaps in justification.	Social media links are present, but evaluation is limited or basic.	Social media integration is weak, poorly placed, or insufficiently evaluated.	No evaluation or improper integration of social media pages.
Website demonstrates strong technical execution, originality, responsiveness,	Good technical execution with minor technical or design inconsistencies.	Average technical execution: basic features work as intended.	Poor execution with multiple technical or design errors.	Website is designed by using AI, incomplete, non-functional, or copied.
